DISCUSSION:

DaimlerChrysler Corporation is now offering airbag on-off switches for the selected vehicles listed above. The switches are packaged in a kit containing all necessary parts (except as indicated) and a detailed instruction sheet. Under the National Highway Traffic Safety Administration's rule, consumers will be authorized for on-off switches by claiming they meet any of several criteria. Airbag on-off switches must not be installed without the vehicle owner presenting the NHTSA authorization letter. For more information concerning the authorization process and/or the authorization letter call NHTSA's Auto Safety Hotline at 1-800-424-9393. We encourage you (dealer) to install these switches when the customer is interested in doing so and has the necessary NHTSA authorization.

DEACTIVATION/DOCUMENTATION PROCEDURE:

1. Before you install any airbag on-off switch for owners of air bag equipped vehicles, the owner **must** present to you an "Authorization Form" from the U. S. Department of Transportation National Highway Traffic Safety Administration (NHTSA), certifying the specific vehicle by its vehicle identification number. The authorization applies **only** to the vehicle identified and not to other vehicles that the owner may have.
2. The owner **must** complete the "Authorization to Install Air Bag On-Off Switch Release Agreement Form" available in the "Forms Folder" under "TSB/Recall" tab of MDS2 and printed on your dealership letterhead. Keep a copy for your records and make a copy for the vehicle owner.
3. Complete the NHTSA authorization form, and return it to NHTSA within seven days, making copies for the owner's and your records.

NOTE: ALL DEALER OWNED USED VEHICLES SHOULD BE INSPECTED FOR PROPER AIRBAG OPERATION, i.e. NOT DEACTIVATED, PRIOR TO RESALE.
